

For Patients: Hair Care for All

New Inclusive Products Available for Hospitalized Patients

Do you have everything you need for your hair while you are hospitalized? Please ask us about new hair products available for inpatients.

The offices of Diversity, Equity and Inclusion and Supply Chain at Beth Israel Lahey Health have partnered with Dudley Beauty, a Minority, Black-Owned Business specializing in high-quality products.

The Dudley Beauty personal care kit includes products for hair that requires more moisture, including shampoo, conditioner, detangler, a wide-tooth comb, as well as a body lotion.

We believe that providing care products for every hair type can enhance your overall experience at our hospital.

If you would like to try the products, please ask a member of your care team.
